# **GeoStat Framework**

***Release 1.0***

**Jul 04, 2021**

---

## Contents

---

<b>1 Included Packages</b>	<b>3</b>
1.1 GSTools . . . . .	3
1.2 PyKrig . . . . .	3
1.3 ogs5py . . . . .	4
1.4 WellTestPy . . . . .	4
1.5 AnaFlow . . . . .	5
1.6 pentapy . . . . .	5

Create your geo-statistical model with Python!

# CHAPTER 1

---

## Included Packages

---

The following Python-Packages are part of the GeoStat Framework.

### 1.1 GSTools

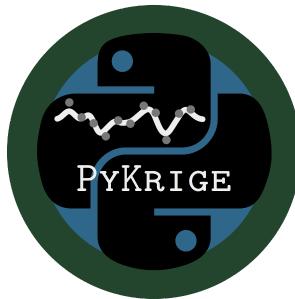

GeoStatTools is a library providing geostatistical tools like kriging, random field generation, variogram estimation, covariance models and much more.

<b>Version</b>	
<b>Installation</b>	<code>pip install gstools or conda install gstools</code>
<b>Source</b>	<a href="https://github.com/GeoStat-Framework/GSTools">https://github.com/GeoStat-Framework/GSTools</a>
<b>Documentation</b>	<a href="https://gstools.readthedocs.io">https://gstools.readthedocs.io</a>

### 1.2 PyKrig

PyKrig provides 2D and 3D ordinary and universal kriging.

<b>Version</b>	
<b>Installation</b>	<code>pip install PyKriging or conda install pykrige</code>
<b>Source</b>	<a href="https://github.com/GeoStat-Framework/PyKriging">https://github.com/GeoStat-Framework/PyKriging</a>
<b>Documentation</b>	<a href="https://pykrige.readthedocs.io">https://pykrige.readthedocs.io</a>

## 1.3 ogs5py

ogs5py is a Python-API for the OpenGeoSys 5 scientific modeling package.

<b>Version</b>	
<b>Installation</b>	<code>pip install ogs5py or conda install ogs5py</code>
<b>Source</b>	<a href="https://github.com/GeoStat-Framework/ogs5py">https://github.com/GeoStat-Framework/ogs5py</a>
<b>Documentation</b>	<a href="https://ogs5py.readthedocs.io">https://ogs5py.readthedocs.io</a>

## 1.4 WellTestPy

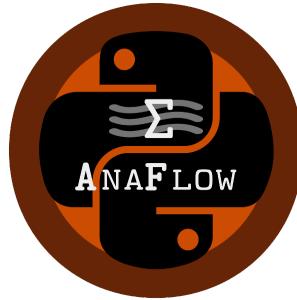

WellTestPy is a python-package for handling well based field campaigns.

<b>Version</b>	
<b>Installation</b>	<code>pip install welltestpy</code>
<b>Source</b>	<a href="https://github.com/GeoStat-Framework/welltestpy">https://github.com/GeoStat-Framework/welltestpy</a>
<b>Documentation</b>	<a href="https://welltestpy.readthedocs.io">https://welltestpy.readthedocs.io</a>

## 1.5 AnaFlow

Anaflow provides several analytical and semi-analytical solutions for the groundwater-flow-equation.

<b>Version</b>	
<b>Installation</b>	<code>pip install anaflow</code>
<b>Source</b>	<a href="https://github.com/GeoStat-Framework/AnaFlow">https://github.com/GeoStat-Framework/AnaFlow</a>
<b>Documentation</b>	<a href="https://anaflow.readthedocs.io">https://anaflow.readthedocs.io</a>

## 1.6 pentapy

pentapy is a toolbox to deal with pentadiagonal matrices in Python.

<b>Version</b>	
<b>Installation</b>	<code>pip install pentapy</code>
<b>Source</b>	<a href="https://github.com/GeoStat-Framework/pentapy">https://github.com/GeoStat-Framework/pentapy</a>
<b>Documentation</b>	<a href="https://pentapy.readthedocs.io">https://pentapy.readthedocs.io</a>
